

Violence against children in and around schools in Malawi

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Malawi, and highlights key data gaps.

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. GSHS 2009 indicates 45% of students experienced **bullying in the last 30 days**.¹ While GSHS does not break down bullying by emotional or physical bullying, VACS 2013 indicates 2% of girls and 8% of boys experienced **physical attacks from peers in their lifetime**.²

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations. Available data indicate 28% of children experienced sexual violence before the age of 18.²

Among those exposed to any form of sexual violence in their lives, 21% occurred at school.

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort. 29% of children reported experiencing corporal punishment from teachers.

Is corporal punishment banned in these settings...⁴

Data Gaps

VACS 2013 covers child prevalence of physical and sexual violence by peers, parents, partners, and teachers, and emotional violence from parents. GSHS 2009 has data on student bullying. DHS (2010, 2015) provides sexual violence data. MICS 2020 provides data on physical attacks^{3*}, and corporal punishment by caretakers. MICS can be broken down by disability status, while other data cannot be disaggregated by LGBT+ or disability status.⁵ The table below denotes where data is available.

Type of Violence	Aged 6 to 12	Aged 13 to 22	2008 - 2012	2013 - 2018	2019 or after
Physical (Peers)	✓	✓	GSHS	VACS	
Emotional (Peers)		✓	GSHS		
Sexual (Peers)		✓		VACS	
Sexual (Teachers)		✓		DHS, VACS	
Corporal Punishment (Teachers)		✓		DHS*, VACS	
Corporal Punishment (Caretakers)	✓	✓		MICS	MICS

Malawi

Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Bullying is...

3 percentage points lower than the Sub-Saharan Africa average, and 7 percentage points higher than average for low- and middle-income countries with data.

Physical Attacks are...

About the same as the Sub-Saharan Africa average.

Sexual Violence is...

About the same as the Sub-Saharan Africa average, and 4 percentage points higher than the average for low- and middle-income countries with data.

GSHS 2009 (+/-) 3 years

VACS 2013 (+/-) 3 years

VACS 2013 (+/-) 3 years

Corporal Punishment (Teachers)

Students who experienced corporal punishment from teachers (%) - VACS 2013 (+/-) 3 years

Corporal Punishment (Caretakers)

Parents who reported using corporal punishment against Children Aged 1 to 14 (%) - MICS 6

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁷
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Malawi's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.

- Calculations using GSHS 2009. Surveyed students are in Standards 7 and 8.
- Calculations using VACS 2013. Surveys ages 13 to 24.
- Calculations using MICS 2020.
- [End Corporal Punishment of Children](#), data accessed 2024. Note: "Some" represents cases where prohibition is stated for specific provisions (eg., [forms of corporal punishment or school levels](#)). Alternative Care refers to cases where a child's primary caregiver is not their parents (eg. foster care).
- [Evans, Hares, Smarrelli, and Wu](#). CGD 2023.
- While DHS asks about teacher and peer perpetrators of physical violence, we exclude from our analysis as the age range does not reflect the period when children are most likely to experience corporal punishment. If the focus is on physical violence against women by teachers starting at age 15, DHS data can provide relevant insights.
