

Violence against children in and around schools in Timor-Leste

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Timor-Leste, and highlights key data gaps.

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. GSHS 2015 indicates 28% of students experienced **bullying in the last 30 days**.¹

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations. Available data indicates that 3% of females aged 15 to 19 **experienced sexual violence in their lifetime**, with 7% of these incidents perpetrated by teachers in 2016. Data for boys is not available.²

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

Students who experienced corporal punishment from teachers (%)²

Caretakers who agree with using corporal punishment (%)

Children who experienced corporal punishment from caretakers (%)

Is corporal punishment banned in these settings...³

Data Gaps

GSHS 2015 has data on student bullying. DHS (2009, 2016) provides sexual violence data. Data cannot be broken down by disability or LGBTQ+ status.⁴ The table below denotes where data is available.

Type of Violence	Aged 6 to 12	Aged 13 to 22	2008 – 2012	2013 – 2018	2019 or after
Physical (Peers)		✓		GSHS	
Emotional (Peers)		✓		GSHS	
Sexual (Peers)					
Sexual (Teachers)		✓	DHS		
Corporal Punishment (Teachers)		✓	DHS ^{2*}		
Corporal Punishment (Caretakers)					

Timor-Leste Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Bullying is...

About the same as the East Asia and Pacific average, and 3 percentage points lower than average for low- and middle-income countries with data.

Bullying data by type is not available

No Data

Sexual Violence is...

3 percentage points lower than the East Asia and Pacific average, and 4 percentage points lower than the average for low- and middle-income countries with data.

GSHS 2015 (+/-) 3 years

DHS 2016 (+/-) 3 years

Corporal Punishment (Teachers)

No Data

Corporal Punishment (Caretakers)

No Data

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁵
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Timor-Leste's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.

Sources

- Calculations using GSHS 2015. Surveyed students are in Standards 7 and 8.
- Calculations using DHS 2016. Surveys women aged 15 - 19. While DHS asks about teacher perpetrators of physical violence, we exclude from our analysis as the age range does not reflect the period when children are most likely to experience corporal punishment. If the focus is on physical violence against women by teachers starting at age 15, DHS data can provide relevant insights.
