

Violence against children in and around schools in Suriname

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Suriname, and highlights key data gaps.

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. GSHS 2016 indicates 27% of students experienced **bullying in the last 30 days**.¹

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations.²

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

Is corporal punishment banned in these settings...⁴

Data Gaps

GSHS 2016 has data on student bullying. MICS 2010 provides data on corporal punishment by caretakers. MICS can be broken down by disability status, while other data cannot be disaggregated by LGBT+ or disability status.⁵ The table below denotes where data is available.

Type of Violence	Aged 6 to 12	Aged 13 to 22	2008 – 2012	2013 – 2018	2019 or after
Physical (Peers)		✓	GSHS	GSHS	
Emotional (Peers)		✓	GSHS	GSHS	
Sexual (Peers)					
Sexual (Teachers)					
Corporal Punishment (Teachers)					
Corporal Punishment (Caretakers)	✓	✓		MICS	

Suriname

Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Bullying is...

2 percentage points higher than the Latin America and Caribbean average, and 5 percentage points lower than average for low- and middle-income countries with data.

Bullying data by type is not available

Sexual Violence data is not available

GSHS 2016 (+/-) 3 years

Corporal Punishment (Teachers)

Corporal Punishment (Caretakers)

Children Aged 2 to 14 who reported experiencing corporal punishment (%) - MICS 4

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁶
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Suriname's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.
