

Violence against children in and around schools in Jamaica

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Jamaica, and highlights key data gaps.

Bullying

Physical bullying refers to a pattern of repetitive aggressive behaviours involving hitting, kicking, pushing, and stealing or destroying personal belongings. 16% of 15 year olds reported experiencing **physical bullying in the last 12 months**.¹

Emotional bullying includes any form of isolating, rejecting, excluding from a group, or any other non-physical form of hostile treatment. 25% of 15 year olds reported experiencing **emotional bullying in the last 12 months**.¹

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations. ²

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

Is corporal punishment banned in these settings...⁴

Data Gaps

PISA 2022 provides information about physical and emotional bullying from peers. **GSHS 2017** has data on student bullying. **MICS 2022** provides data on corporal punishment by caretakers. MICS can be broken down by disability status, while other data cannot be disaggregated by LGBT+ or disability status.⁵ The table below denotes where data is available.

Type of Violence	Aged 6 to 12	Aged 13 to 22	2008 - 2012	2013 - 2018	2019 or after
Physical (Peers)	✓	✓	GSHS	GSHS	, PISA
Emotional (Peers)		✓	GSHS	GSHS	PISA
Sexual (Peers)					
Sexual (Teachers)					
Corporal Punishment (Teachers)					
Corporal Punishment (Caretakers)	✓	✓			MICS

Jamaica Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Physical Bullying is...

About the same as the Latin America and Caribbean average, and 3 percentage points lower than the average for middle-income countries with data.

Emotional Bullying is...

5 percentage points lower than the Latin America and Caribbean average, and 3 percentage points lower than the average for middle-income countries with data.

Sexual Violence data is not available

Corporal Punishment (Teachers)

----- No Data -----

Corporal Punishment (Caretakers)

Children Aged 1 to 14 who experienced corporal punishment (%) - MICS 6

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁶
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Jamaica's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.
- Jamaica participated in a benchmarking exercise with [Safe to Learn](#), which establishes a baseline to monitor progress in ending violence against children in and around schools. Results are forthcoming.
