

Violence against children in and around schools in Kiribati

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Kiribati, and highlights key data gaps.

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. Overall data on bullying is not available.¹ 8% of girls and 12% of boys aged 15-19 experienced physical attacks in the last 3 years (by any perpetrator), of which 2% and 1% occurred in schools.³

Sexual Violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations.²

Corporal Punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

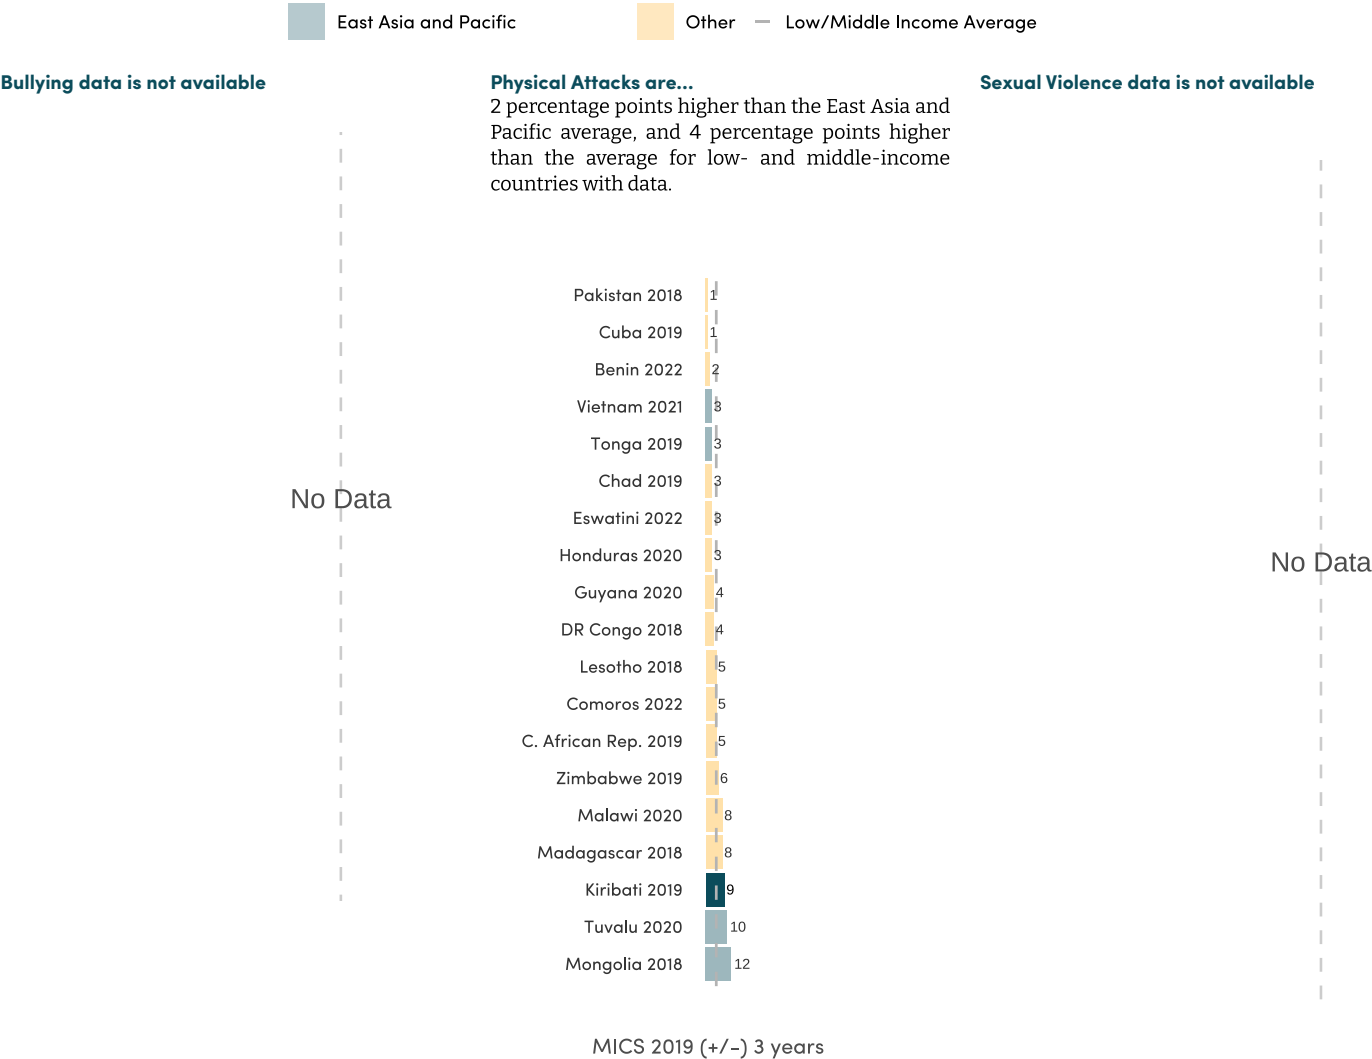

Data Gaps MICS 2019 provides data on physical attacks^{3*}, and corporal punishment by caretakers. MICS can be broken down by disability status, while other data cannot be disaggregated by LGBT+ or disability status.⁵ The table below denotes where data is available.

Type of Violence	Aged 6 to 12	Aged 13 to 22	2008 – 2012	2013 – 2018	2019 or after
Physical (Peers)	✓	✓			
Emotional (Peers)					
Sexual (Peers)					
Sexual (Teachers)					
Corporal Punishment (Teachers)					
Corporal Punishment (Caretakers)	✓	✓			MICS

Kiribati

Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Corporal Punishment (Teachers)

No Data

Corporal Punishment (Caretakers)

Children Aged 1 to 14 who experienced corporal punishment (%) - MICS 6

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁶
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Kiribati's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.

Sources

1. Examples of surveys that include questions on bullying are PIRLS, PISA, TIMSS, and GSHS.
2. Data for sexual violence against children includes VACS, DHS, and PISA-D.
3. Calculations using MICS 2019. For physical attacks, we cannot distinguish whether perpetrators were teachers or classmates.
4. [End Corporal Punishment of Children](#), data accessed 2024. Note: "Some" represents cases where prohibition is stated for specific provisions (eg., [forms of corporal punishment or school levels](#)). Alternative Care refers to cases where a child's primary caregiver is not their parents (eg. foster care).
