Violence against children in and around schools in Haiti

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Haiti, and highlights key data gaps.

Bullying

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. Bullying data is not available.¹

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations. Available data indicates that 7% of females aged 15 to 19 experienced sexual violence in their lifetime.² Data on the location of the incident and the type of perpetrator are not available; therefore, it is not possible to determine whether sexual violence incidents occurred in schools. Additionally, data for boys is not available.

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

Is corporal punishment banned in these settings...3

Data Gaps

Data cannot be broken down by disability or LGBTQ+ status.⁴ The table below denotes where data is available.

Aged 6 to 12	Aged 13 to 22	2008 - 2012	2013 - 2018	2019 or after

Bullvina data is not available 2 percentage points higher than the Latin America and Caribbean average, and about the same as the average for low- and middle-income countries Myanmar 2015 South Africa 2016 Senegal 2017 Timor-Leste 2016 Sierra Leone 2019 Mauritania 2019 India 2019 Guatemala 2017 Ethiopia 2016 Chad 2014 Dominican Rep. 2013 Angola 2015 Togo 2013 No Data Liberia 2019 The Gambia 2019 6 Egypt 2014 Benin 2017 Zambia 2014 Pakistan 2017 Haiti 2016 Afghanistan 2015 Nigeria 2014 8 Namibia 2019 Cameroon 2018 Zimbabwe 2017 10 Uganda 2015 10 Mali 2018 10 Burundi 2016 10 11 Gabon 2019 Maldives 2016 12 Rwanda 2019 Malawi 2013 15 Papua New Guinea 2016 DR Congo 2013 DHS 2016 (+/-) 3 years **Corporal Punishment (Teachers)**

Notes

Corporal Punishment (Caretakers)

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁵
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Haiti's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.

-No Data-

Sources

- $1. \, Examples \, of \, surveys \, that \, include \, questions \, on \, bullying \, are \, PIRLS, \, PISA, \, TIMSS, \, and \, GSHS.$
- 2. Calculations using DHS 2016. Surveys women aged 15 19. While DHS asks about teacher perpetrators of physical violence, we exclude from our analysis as the age range does not reflect the period when children are most likely to experience corporal punishment. If the focus is on physical violence against women by teachers starting at age 15, DHS data can provide relevant insights.
- 3. End Corporal Punishment of Children, data accessed 2024. Note: "Some" represents cases where prohibition is stated for specific provisions (eg., forms of corporal punishment or school levels). Alternative Care refers to cases where a child's primary caregiver is not their parents (eg. foster care).
